
Update: 2022 City of Durham SCA – ADA Ramps Project

We will be starting construction this week on 6/22/22. We will be replacing various ADA ramps to bring them up to code. Expect to see some construction equipment and crew trucks. The areas that will be affected are painted with white paint. After the ramps are set and poured, we will pave and clean up.

Please call Luke at 503-899-9503 if you have any immediate concerns. If you would like any additional concrete work, please let us know as well.

We apologize for any inconvenience and appreciate your continued cooperation while we work to improve storm and pedestrian access.
